SEC. 2. FINDINGS.

Congress finds the following:

(1) Ambulatory surgery centers were not covered under the provisions of the HITECH Act of 2009, which created certification standards and incentives for adopting electronic health record (EHR) technology in the physician office and hospital settings.

(2) The Centers for Medicare & Medicaid Services (CMS) defines a meaningful EHR user as an eligible professional having 50 percent or more of the professional’s outpatient encounters at practices or locations equipped with certified EHR technology.

(3) Physicians with patient encounters in an ambulatory surgical center are at a disadvantage when attempting to meet meaningful use requirements because there currently is not certified EHR technology for such centers.

(4) Until such time as EHR technology is certified specifically for use in the ambulatory surgical centers, patient encounters that occur in such a center should not be used when calculating whether an eligible professional meets meaningful use requirements, unless an eligible professional elects to include those encounters.
